Announcement for Discontinuation of Ultrasonic Level Meter

To whom it may concern;

We sincerely appreciate your continuous support and confidence in our products and services.

We have supplied Ultrasonic Level Meter (USLM series) for a long time. Since microwave technology has grown in the industrial measurement field and covers most level measurement applications, it is difficult to maintain the internal production control for Ultrasonic Level Meter.

Thus, we regrettably decided to discontinue the production of Ultrasonic Level Meter.

We apologize for any inconvenience it may cause you, but hope your kind acceptance.

- **Discontinued sensor:** Ultrasonic Level Meter
(Model: USLM-PE92, 93, and 95 series)
* USLM-PE91 and 96 have been discontinued
since November 2012.
- **Discontinued date:** End of March 2020
- **Available period for repair service:** Until End of March 2023
(All parts will be supplied
as long as it is available in our stock.)
- **Successor model:** Radar Transmitter
Model: MWLM-PR26 series
(Under some special applications,
other solution or models may be substituted.)

If you have any request, please do not hesitate to contact with our distributor or me.

Sincerely yours,

Kazuhito Maeda
Export Manager
