

Radar Transmitter Customized Models

A variety of customized lineup as per unique applications

PTFE Corn Antenna (Liquid)

Reliably works in corrosive environment

Flat antenna

Securely mounted at application where Horn antenna is not allowed to be inserted.

Sunshade cover

Optionally added to safely install Radar transmitter outdoors.

Sidewall antenna

Even if no space above silo and hopper, it can measure from sidewall.

Cooling box

In high-temperature environment, Cooling box protects Radar transmitter.

Coated Antenna

Coated antenna can reduce adhesion on it.

Mounting nozzle attached

Mounting base can be designed for each facility structure.

Dust cap

Dust cap can prevent material adhesion inside horn antenna.

Sidewall antenna

Even if no space above silo and hopper, it can measure from sidewall.

Heat-resistant measure

Heat radiation fin, heat-resistant tape for protection from high-temperature environment.
