

Radar Transmitter Chutes of wood chips Reliable measurement through sidewall installation!!

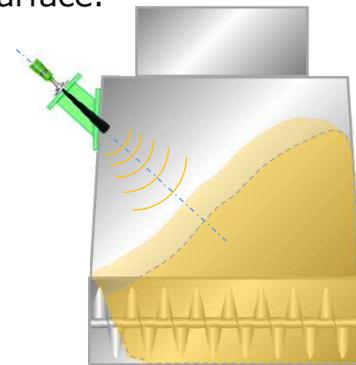

If there is no space at the top of the chute, the level can be measured from the sidewall. A mounting base fitting with the chute dimension can be designed and supplied.

A mounting base fitting with the chute dimension

Attention 1

The radar transmitter gets stable reflections with mounting perpendicular to the material surface.

Attention 2

Antenna

Although it is easy to build up the material in the chute because of high humidity, the special coated antenna prevent the material adhesion inside the antenna.

※The coating antenna may not be effective in dry environment.
